

2016 | KOMORI GL 640 C HYBRID

+ STAMPA OFFSET ANNO: 2016 6 COLOR + COATER

Descrizione della stampante

The machine is equipped with a complete drying system including UV, H-UV and IR technology, providing high flexibility for a wide range of production requirements. Configuration includes two UV interdeck lamps, movable between printing units (positions 1, 2, 4, 5 and 6), allowing optimized curing depending on job setup. Additionally, the press is fitted with an IR dryer with integrated hot air at the end of press (EOP), as well as one UV lamp at delivery, ensuring efficient drying performance for both conventional and UV applications. The drying system is supplied by Baldwin (OEM), guaranteeing reliable operation and industrial production standards.
